Board of Supervisors
Regular Meeting
October 7, 2026

Correspondence

- Received correspondence from KU Resources, Inc. stating they need to include the Municipal Land Use Letter with the permit application. If they do not receive the letter within 30 days, they will continue to submit the permit without it and will provide proof that they attempted to obtain it and the PA DEP will assume there are no substantive land use conflicts and proceed with the normal application review process. Said property location is 1151 Oak Lake Road.

- Received correspondence from Civil & Environmental Consultants, Inc., notifying the township under the requirements of Act 14, 67, 68 and 127 of the Municipalities Planning Code is to inform the township that EQT Production Company is applying to the PA DEP for an Erosion and Sediment Control General Permit (ESCGP-4) for Earth Disturbance Associated with Oil and Gas Exploration, Production, Processing or Treatment Operations or Transmission Facilities associated with the Guyer to Zeus Waterline Project.

  Project Location and Description: The project will include approximately 0.32 mile of one (1) 16-inch waterline between Guyer Road and the existing Zeus Well Pad locate in the township. The waterline is to be installed as a combination of temporary 16-inch lay flat or high-density polyethylene (HDPE) and permanent 16-inch HDPE section beneath existing access roads.

- Received correspondence from Civil & Environmental Consultants, Inc., notifying the township under the requirements of Act 14, 67, 68 and 127 of the Municipalities Planning Code is to inform the township that EQT Production Company is applying to the PA DEP for a Chapter 105 General Permit Registration for Utility Line Crossings (GP-5) and Temporary Road Crossings (GP-8) of streams, floodways, and wetlands. EQT is also Erosion and Sediment Control General Permit (ESCGP-4) for Earth Disturbance Associated with Oil and Gas Exploration, Production, Processing or Treatment Operations or Transmission Facilities associated with the Selene to Zeus Waterline Project.

Project Location and Description: The project will include approximately 3.1 miles of waterline between a proposed tap along State Route 780 and the existing Zeus Well Pad located in the township. The waterline will be installed as a combination of temporary aboveground piping and permanently buried piping. The waterline will cross Irwin Road, Oak Lake Road (S.R. 4036), Rich Hill Road, and Schafer Drive (S.R. 4075).
